Exercise 0 Mask & Hands

SAUL STEINBERG MASKS

For the first week we are going to design and make a set of “*mask and hands*” that represents the landscape assigned, as a superhero impression related with the local identity.

There will be a direct and intuitive quick reaction to this answer. So it means to put in practice the previous knowledge and tools in order to express the maximum using the most effective tactics.

However each student must work in a very conscious way with the materials and tools used for the mask & hands construction, and with the concepts that are going to be included in the solution designed, that must keep in the cultural background of each productive landscape.

The final goal is an opening ceremonial party, in with there will be an exhibition of the whole class dressed with their own masks.

Mask & Hands Party Wednesday 14 class timetable.
